SQL and NoSQL
Mentorship
Code Hygiene
Cursor and Claude Code

HOBBIES

Photography
Filmmaking
Music

SUMMARY

Senior software developer with expertise in systems design and backend infrastructure, looking to leverage my skills with a company that handles large scale, public facing, fault tolerant API.

PROFESSIONAL EXPERIENCE

Tech Lead (Hybrid Senior Engineer/Manager Role | Full-Stack)

JobTarget, Stamford, CT | Mar 2021 – Mar 2026

NodeJS, SailsJS, C#/.NET, ReactJS, StencilJS, MongoDB, MSSQL, Cursor, AWS

- Built, extended, deployed, and hot fixed business critical APIs and full stack public facing applications handling thousands of users daily
- Scaled and modernized applications vertically and horizontally – leveraging AWS S3, Lambdas, SQS, CloudFront, EventBridge, etc
- Significantly reduced or removed the need for custom code – Leveraged configuration based architecture for faster onboarding of more than 10 new B2B customers
- Code reviews and enforced better practices, scaled up development with Cursor - Reduced or eliminated turnaround time between Dev and QA cycles (roughly 60%-70% reduction in turnaround minimum)
- Systems design and technical design – Contributed to or spearheaded fault tolerant cross application system level architecture – both realtime and async from design to deployment
- Implemented recoverability and fault tolerant measures

Software Engineer

MJC Consulting, New York, NY | Dec 2019 – Mar 2021

C# MVC, VB, MSSQL, AWS

- Full Stack Software development consultant

Tech Lead (Hybrid Senior Engineer/Manager Role | Full Stack)
